

Lap Band Changes Life

Lap Band Changes Life

A few months after having Lap Band surgery TopSurgeons patient Marciano had lost some 50 pounds, describing the procedure as a life-changing event.

According to Marciano, he still has another 40 to 50 pounds that he would like to lose. He is moving in the right direction, reporting he loses one to two pounds a week. Having had Lap Band surgery, Marciano sees the results. He can walk further, doesn't run out of breath doing stairs, and doesn't seek out the closest parking spot to the front door at the store. Getting the proper rest and sleep through the night have also been bonuses for Marciano since coming to TopSurgeons.

Karen and Marciano are just two of many examples of patients who have come through the doors at TopSurgeons. They have both discovered the exciting world of Lap Band surgery.

Each individual's weight loss with Lap Band surgery can oftentimes vary. Many individuals who have tried Lap Band surgery have come away very happy with the results. The weight loss results are proof of just how effective the Lap Band surgery can really be.
